ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: A DEVICE FOR SUBCUTANEOUS ADMINISTRATION OF A MEDICAMENT TO A PATIENT AND TUBING
FOR SAME

(57) Abstract: The invention relates to a device for sub-
cutaneous administration of a medicament to a patient,
comprising a cannula housing (1) with an interior cham-
ber; a cannula (2) connected to the cannula housing (1)
and being in flow communication with the interior cham-
ber; a tubing (4) manufactured from a flexible material
and having a first end (4'), coupled to the cannula hous-
ing (1) in such a manner that the tubing (4) is in flow
communication with the interior chamber; and wherein
the tubing (4), at the other end, carries a source coupling
(5), by which the tubing can be coupled to a source for
said medicament. The invention is characterised in that,
at least over a section of its length, the tubing comprises a
longitudinally extending, external groove (12) and a lon-
gitudinally extending, external protrusion (11) arranged
diametrically opposite the groove (12) and complemen-
tary with said groove (12); and that, using the flexibility
of its material, the groove (12) is configured for being

able to receive and secure the protrusion (11) in a releasable manner in a configuration of the tubing (4), in which the tubing (4) is folded (9) for forming parallel courses of tubing (14, 24, 34). The invention also relates to a tubing configured for use in said device.
